CONTENTS OF VOLUME 26

Number 1

1 Optimal hydraulic design of earth dam cross section using saturated–unsaturated seepage flow model
Y.-Q. XU, K. UNAMI & T. KAWACHI

9 Influence of the tide on the mean watertable in an unconfined, anisotropic, inhomogeneous coastal aquifer
H. LI & J.J. JIAO

17 Theoretical analysis of the worthiness of Henry and Elder problems as benchmarks of density-dependent groundwater flow models
M.J. SIMPSON & T.P. CLEMENT

33 Multi-scale assimilation of surface soil moisture data for robust root zone moisture predictions
N. MONTALDO & J.D. ALBERTSON

45 Hydrologic controls on soil carbon and nitrogen cycles. I. Modeling scheme
A. PORPORATO, P. D'ODORICO, F. LAIO & I. RODRIGUEZ-ITURBE

59 Hydrologic controls on soil carbon and nitrogen cycles. II. A case study
P. D'ODORICO, F. LAIO, A. PORPORATO & I. RODRIGUEZ-ITURBE

71 Some comments on the scale dependence of the hydraulic conductivity in the presence of nested heterogeneity
A.G. HUNT

79 Assimilation of near-surface temperature using extended Kalman filter
P. KUMAR & A.L. KALEITA

95 Pipe system diagnosis and leak detection by unsteady-state tests. 1. Harmonic analysis
M. FERRANTE & B. BRUNONE

107 Pipe system diagnosis and leak detection by unsteady-state tests. 2. Wavelet analysis
M. FERRANTE & B. BRUNONE

117 Coupled reactive mass transport and fluid flow: Issues in model verification
V.L. FREEDMAN & M. IBARAKI

129 Conference Diary

Number 2

131 Preface

137 The assimilation of remotely sensed soil brightness temperature imagery into a land surface model using Ensemble Kalman filtering: a case study based on ESTAR measurements during SGP97
W.T. CROW & E.F. WOOD

151 Assimilation of remotely sensed latent heat flux in a distributed hydrological model
J.M. SCHUURMANS, P.A. TROCH, A.A. VELDHUIZEN, W.G.M. BASTIAANSSEN & M.F.P. BIERKENS

161 Newtonian nudging for a Richards equation-based distributed hydrological model
C. PANICONI, M. MARROCU, M. PUTTI & M. VERBUNT

179 Physiological tradeoffs in the parameterization of a model of canopy transpiration
D.S. MACKAY, D.E. AHL, B.E. EWERS, S. SAMANTA, S.T. GOWER & S.N. BURROWS

195 Hydrologic modeling of extreme floods using radar rainfall estimates
F. GIANNONI, J.A. SMITH, Y. ZHANG & G. ROTH

205 Parameter estimation in distributed hydrological catchment modelling using automatic calibration with multiple objectives
H. MADSEN

217 Conference Diary

Number 3

219 Dominant physical controls on hourly flow predictions and the role of spatial variability: Mahurangi catchment, New Zealand
S.E. ATKINSON, M. SIVAPALAN, R.A. WOODS & N.R. VINEY

237 Measuring and simulating moisture uptake in a fractured porous medium
S. ROELS, K. VANDERSTEEN & J. CARMELIET

247 Convergence of iterative split-operator approaches for approximating nonlinear reactive transport problems
J.F. KANNEY, C.T. MILLER & C.T. KELLEY

263 Penetrative convection in a fluid overlying a porous layer
M. CARR & B. STRAUGHAN

277 Importance of subgrid-scale parameterization in numerical simulations of lake circulation
Y. WANG

295 The relative roles of climate, soil, vegetation and topography in determining seasonal and long-term catchment dynamics
R. WOODS

311 The effect of spatially distributed meteorological parameters on irrigation water demand assessment
I.K. TSANIS & S. NAOUM

325 Markov cross-correlation pulse model for daily streamflow generation at multiple sites
Z. XU, A. SCHUMANN & J. LI

337 Estimation of optimal parameters for a surface hydrology model
L.W. WHITE, B. VIEUX, D. ARMAND & F.X. LEDIMET

349 Erratum

351 Conference Diary

Number 4

353 Comparison of fully coupled approaches for approximating nonlinear transport and reaction problems
J.F. KANNEY, C.T. MILLER & D.A. BARRY

373 Mixed finite element methods and higher order temporal approximations for variably saturated groundwater flow
M.W. FARTHING, C.E. KEES & C.T. MILLER

395 A complex variable boundary-element strategy for determining groundwater flownets and travel times
T.C. RASMUSSEN & G.-Q. YU

407 Time changes in spatial structure of surface variability in the Southern Great Plains
M.H. COSH, J. STEDINGER & W. BRUTSAERT

417 Kinematic wave parameters and time of travel in circular channel revisited
T.S.W. WONG & M.C. ZHOU

427 Probability distribution of bed particle instability
N.-S. CHENG, A.W.-K. LAW & S.Y. LIM

435 Control volume function approximation methods and their applications to modeling porous media flow
B. LI, Z. CHEN & G. HUAN

445 Estimating unique soil hydraulic parameters for sandy media from multi-step outflow experiments
S.I. HWANG & S.E. POWERS

457 Significance of AIC differences for precipitation intensity distributions
A.T. CAHILL

465 Universal optimization of water quality management strategy
K. UNAMI & T. KAWACHI

473 Erratum

475 Conference Diary

Number 5

477 Sub-timing in fluid flow and transport simulations
S.M. BHALLAMUDI, S. PANDAY & P.S. HUYAKORN

491 Mean-value second-order uncertainty analysis method: application to water quality modelling
A. MAILHOT & J.-P. VILLENEUVE

501 Impact of measurement errors in stochastic inverse conditional modelling by the self-calibrating approach
H.J.W.M. HENDRICKS FRANSSEN & J.J. GÓMEZ-HERNÁNDEZ

513 The effective resistance to vertical flow in Dupuit models
E.I. ANDERSON

525 Numerical modeling of turbulent flow in curved channels of compound cross-section
X. SHAO, H. WANG & Z. CHEN

541 Stochastic study on groundwater flow and solute transport in a porous medium with multi-scale heterogeneity
B.X. HU, J. WU, A.K. PANORSKA, D. ZHANG & C. HE

561 Use of porosity to estimate hydraulic properties of volcanic tuffs
L.E. FLINT & J.S. SELKER

573 Zero-covariance hypothesis in the error variance separation method of radar rainfall verification
G.J. CIACH, E. HABIB & W.F. KRAJEWSKI

581 Stochastic–dynamical rainfall simulation based on weather radar volume scan data
H. ANDRIEU, M.N. FRENCH, W.F. KRAJEWSKI & K.P. GEORGAKAKOS

595 Conference Diary

Number 6

597 Editorial

599 Temporal moments of a tracer pulse in a perfectly parallel flow system
W.E. BARDSLEY

609 Prediction of interfacial areas during imbibition in simple porous media
M. GLADKIKH & S. BRYANT

623 Two-dimensional free surface flow in branch channels by a finite-volume TVD scheme
J. WANG, Y. HE & H. NI

635 A kinetic flux vector splitting scheme for shallow water flows
S.Q. ZHANG, M.S. GHIDAOUI, W.G. GRAY & N.Z. LI

649 Numerical analogs to Fourier and dispersion analysis: development, verification, and application to the shallow water equations
C.M. SZPILKA & R.L. KOLAR

663 Markov chain-based modeling techniques for stochastic generation of daily intermittent streamflows
H. AKSOY

673 Attenuating reaches and the regional flood response of an urbanizing drainage basin
D.F. TURNER-GILLESPIE, J.A. SMITH & P.D. BATES

685 Two-dimensional multiple grid algorithm for modeling transient open channel flows
P. RAO

691 Acknowledgements

693 Conference Diary

Number 7

695 New equations for binary gas transport in porous media, Part 1: equation development
A.S. ALTEVOGT, D.E. ROLSTON & S. WHITAKER

717 New equations for binary gas transport in porous media, Part 2: experimental validation
A.S. ALTEVOGT, D.E. ROLSTON & S. WHITAKER

725 Water level dynamics in the Amazon floodplain
I.B.T. LIMA, R.R. ROSA, F.M. RAMOS & E.M.L. DE MORAES NOVO

733 Numerical validation of the land surface process component of an LSP/R model
J. JUDGE, L.M. ABRIOLA & A.W. ENGLAND

747 A new closed-form solution for a radial two-layer drawdown equation for groundwater under constant-flux pumping in a finite-radius well
H.-D. YEH, S.-Y. YANG & H.-Y. PENG

759 Non-ergodic solute transport in self-similar porous formations: the effect of conditioning
A. BELLIN & A. FIORI

773 Pore space analysis of NAPL distribution in sand–clay media
D. MATMON & N.J. HAYDEN

787 Incompressible SPH method for simulating Newtonian and non-Newtonian flows with a free surface
S. SHAO & E.Y.M. LO

801 Conference Diary

Number 8

803 Flow and solute transport around injection wells through a single, growing fracture
S.L. BRYANT, R.K. PARUCHURI & K.P. SARIPALLI

815 Transport of reactive chemicals in sediment-laden streams
R. REVELLI & L. RIDOLFI

833 Efficient steady-state solution techniques for variably saturated groundwater flow
M.W. FARTHING, C.E. KEES, T.S. COFFEY, C.T. KELLEY & C.T. MILLER

851 Computational improvement for dynamic programming models by diagnosing infeasible storage combinations
S.J. MOUSAVI & M. KARAMOUZ

861 Finite-volume component-wise TVD schemes for 2D shallow water equations
G.-F. LIN, J.-S. LAI & W.-D. GUO

875 A diffusive model for evaluating thickness of bedload layer
N.-S. CHENG

883 Hydraulic conductivity of partially saturated fractured porous media: flow in a cross-section
D. OR & M. TULLER

899 Conference Diary

Number 9

901 Preface

907 The hydraulic characteristics and geochemistry of hyporheic and parafluvial zones in Arctic tundra streams, north slope, Alaska
K.J. EDWARDSON, W.B. BOWDEN, C. DAHM & J. MORRICE

925 Comparing transient storage modeling and residence time distribution (RTD) analysis in geomorphically varied reaches in the Lookout Creek basin, Oregon, USA
M.N. GOOSEFF, S.M. WONDZELL, R. HAGGERTY & J. ANDERSON

939 Predicting changes in hydrologic retention in an evolving semi-arid alluvial stream
J.W. HARVEY, M.H. CONKLIN & R.S. KOELSCH

951 Comparison of transient storage in vegetated and unvegetated reaches of a small agricultural stream in Sweden: seasonal variation and anthropogenic manipulation
M. SALEHIN, A.I. PACKMAN & A. WÖRMAN

965 A regression approach to estimating reactive solute uptake in advective and transient storage zones of stream ecosystems
S.A. THOMAS, H.M. VALETT, J.R. WEBSTER & P.J. MULHOLLAND

977 Numerical modeling of coupled nitrification–denitrification in sediment perfusion cores from the hyporheic zone of the Shingobee River, MN
R.W. SHEIBLEY, A.P. JACKMAN, J.H. DUFF & F.J. TRISKA

989 Unsaturated hyporheic zone flow in stream/aquifer conjunctive systems
G.A. FOX & D.S. DURNFORD

1001 Incorporating transient storage in conjunctive stream–aquifer modeling
Y.-C. LIN & M.A. MEDINA JR.

1021 Temporal moments routing in streams and rivers with transient storage
B.H. SCHMID

1029 Quantitatively directed sampling for main channel and hyporheic zone water-quality modeling
T. SUPRIYASILP, A.J. GRAETTINGER & S.R. DURRANS

1039 Conference Diary

Number 10

1041 A coupled local–global upscaling approach for simulating flow in highly heterogeneous formations
Y. CHEN, L.J. DURLOFSKY, M. GERRITSEN & X.H. WEN

1061 A pore network model for calculation of interfacial velocities
H.F. NORDHAUG, M. CELIA & H.K. DAHLE

1075 Streamline-based simulation of virus transport resulting from long term artificial recharge in a heterogeneous aquifer
R.M. MAXWELL, C. WELTY & A.F.B. TOMPSON

1097 Modeling NAPL dissolution fingering with upscaled mass transfer rate coefficients
P.T. IMHOFF, M.W. FARTHING & C.T. MILLER

1113 Two-dimensional Laplace-transformed power series solution for solute transport in a radially convergent flow field
J.-S. CHEN, C.-W. LIU & C.-M. LIAO

1125 Green's function-based integral approaches to head fluctuations in a coastal leaky confined aquifer system
O.O. ONYEJEKWE

1135 Conference Diary

Number 11

1137 A computationally practical method for stochastic groundwater modeling
S.-G. LI, D. MCLAUGHLIN & H.-S. LIAO

1149 A three-dimensional numerical method of moments for groundwater flow and solute transport in a nonstationary conductivity field
J. WU, B.X. HU, D. ZHANG & C. SHIRLEY

1171 Comparison of celerity-based with velocity-based time-of-concentration of overland plane and time-of-travel in channel with upstream inflow
T.S.W. WONG

1177 On importance sampling Monte Carlo approach to uncertainty analysis for flow and transport in porous media
Z. LU & D. ZHANG

1189 Stability and accuracy of two-dimensional kinematic wave overland flow modeling
F.H. JABER & R.H. MOHTAR

1199 Influence of hysteresis on tidal capillary fringe dynamics in a well-sorted sand
A.D. WERNER & D.A. LOCKINGTON

1205 Tests of predicted downstream transport of clasts in turbulent flow
A.G. HUNT & A.N. PAPANICOLAOU

1213 Comment on ''Some comments on the scale dependence of the hydraulic conductivity in the presence of nested heterogeneity'' by A.G. Hunt
S.P. NEUMAN

1215 Reply to Comments by S.P. Neuman on ''Some comments on the scale dependence of the hydraulic conductivity in the presence of nested heterogeneity''
A.G. HUNT

1217 Conference Diary

Number 12

1219 Parameters affecting maximum fluid transport in large aperture fractures
M.I. DRAGILA & N. WEISBROD

1229 Laplace-transform analytic element solution of transient flow in porous media
A. FURMAN & S.P. NEUMAN

1239 A new analytical solution for water table fluctuations in coastal aquifers with sloping beaches
H.T. TEO, D.S. JENG, B.R. SEYMOUR, D.A. BARRY & L. LI

1249 Fuzzy logic algorithm for runoff-induced sediment transport from bare soil surfaces
G. TAYFUR, S. OZDEMIR & V.P. SINGH

1257 Drainage in finite-sized unsaturated zones
D.A. DICARLO

1267 Species differences in stomatal control of water loss at the canopy scale in a mature bottomland deciduous forest
D.E. PATAKI & R. OREN

1279 Renormalization group methods in subsurface hydrology: overview and applications in hydraulic conductivity upscaling
D.T. HRISTOPULOS

1309 Conference Diary

I Contents of Volume 26
